Adhesive Type	Air Egress DryApply
Usage	Interior
Available Width(s)	44”
Full Roll Length	50 linear feet
Thickness	12mil
Visible Light Transmission (%)	55%
UV Transmission (%)	2%
Infrared Transmission (%)	50%

Product Construction

Face Film: 12mil Complex Construction

Adhesive Release: Clear, Air Egress, SOLYX® DryApply, pressure-sensitive

Liner: Paper

Product Detail

SOLYX® SXN-1730 **Banana** is made from 100% kozo with large pieces of banana bark as added inclusions. Kozo is the inner bark of mulberry tree, which is harvested without harming the tree. The banana tree inclusions are taken from the tree after the banana harvest is completed and would normally be discarded without any other use.

The inclusions of the banana bark are random so each foot of film will differ. The base fiber is kozo and it is light, crisp and semi-translucent.

This film features SOLYX “DryApply” technology. Simply remove the protective backing and squeegee directly onto the glass surface dry. Do not use any solutions to install this product.
